

Precision Thoracic Surgery with 3D Imaging in Surgical Planning and Guidance

5th August 2023, Saturday

HKG : 16:00 - 18:00
FRA : 10:00 - 12:00
JPN : 17:00 - 19:00

Webinar

Dr. Alan Sihoe

Dr. Matthieu Sarsam

Dr. Masaaki Sato

AGENDA

| | |
|-------------------|--|
| HKG 16:00 - 16:10 | Opening |
| HKG 16:10 - 16:30 | Precision Thoracic Surgery - Fundamentals, Potentials, Challenges Dr. Alan Sihoe Honorary Consultant in Cardio-thoracic Surgery, Gleneagles Hospital Hong Kong, Hong Kong Consultant in Cardio-Thoracic Surgery, CUHK Medical Centre, Hong Kong |
| HKG 16:35 - 16:55 | The Role of 3D Reconstructions in The Era of Personalised Thoracic Surgery Dr. Matthieu Sarsam Consultant Thoracic Surgeon, Rouen University Hospital – Rouen, France |
| HKG 17:00 - 17:20 | Latest Advances in 3D Imaging for Thoracic Surgery Dr. Masaaki Sato Associate Professor, Organ Transplantation Center, The University of Tokyo, Tokyo, Japan |
| HKG 17:20 - 18:00 | Q&A |

It is a series of cross-region symposiums to discuss how 3D imaging helps in surgical planning and guidance for achieving precision surgery under 3 specialities: Thoracic, Urology and Hepatobiliary and pancreas.

In the first webinar, we are honoured to have three well-known and admirable speakers to share their knowledge, experience and insights regarding the existing challenges, development and the future of precision thoracic surgery.

Dr. Alan Sihoe will share the crucial elements of practising precision thoracic surgery, the new opportunities in precision thoracic surgery and point out the challenges that thoracic surgeons face in the future.

Dr. Matthieu Sarsam will share his experience in utilizing 3D imaging in thoracic surgical planning and practical patient cases.

Dr. Masaaki Sato will share the latest development in 3D imaging for thoracic surgery and insights in precision thoracic surgery.
